(54) INFORMATION RETRIEVING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an information retrieving device that can easily conform the existence of retrieval information to be wanted to refer to after leading retrieval information, and facilitates to display the retrieval information.

SOLUTION: When an instruction processing part 4 is connected to a WWW server by a communication controlling part 7, it acquires the link relation of each page that hierarchically exists from a home page and link relation information including each page address in the range of a retrieval condition that is stored in a retrieval condition storage file 5 and stores them in a link information file 6. Also, it controls a display processing part 9, shows the link relation information stored in a displaying memory part 10 on a display device 11, also directly connects to a page on a display screen, acquires the content of information and displays it.

LEGAL STATUS

[Date of request for examination] 18.03.1997

[Date of sending the examiner's decision of rejection] 18.07.2000

[Kind of final disposal of application other than
the examiner's decision of rejection or application
converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of
rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
